NGRERP - The Best Cloud ERP for the Enterprise

According to Gartner, cloud computing is the global CIO priority for 2013 and beyond. Enterprises are turning to cloud solutions at a rate four times greater than on-premise software. More than 40% of the cloud will be tapped by enterprises with 1,000-plus employees by 2014—transforming IT budgets, eliminating the costly upgrade treadmill, enabling the mobile workforce and reallocating IT resources from maintenance to innovation.

Successfully executing your enterprise cloud ERP strategy means turning to the best cloud ERP solution - NGRERP. Enterprises that run NGRERP:

- Free themselves from expensive and disruptive upgrades

- Deploy across divisions and subsidiaries with unprecedented speed and efficiency

- Transform their IT budget—reducing cost and driving business results

- Gain ERP that is flexible and changes with the needs of the business.

YOUR LAST-EVER ERP UPGRADE

It's easy for on-premise ERP to become "version-locked". Version-lock is when ERP customizations make every upgrade a costly, disruptive, lengthy and error-prone process. It's the reason that, according to Forrester, about half of ERP deployments are locked on versions four or more years old, translating to wasted maintenance spend and users struggling with aging functionality.

NGRERP frees your business from the upgrade treadmill by providing every upgrade automatically. Your business gains competitive advantage by always running the latest, most advanced functionality. And customizations no longer hold your business back, because with NGRERP they migrate with every upgrade.

Deploys in Weeks and Months, Not Years

NGRERP cloud delivery enables deployment many times faster than traditional ERP systems — weeks not months, and months not years. Enterprises can roll out NGRERP across subsidiaries with a single on-demand NGRERP instance with unprecedented speed by completely eliminating time wasted provisioning and deploying infrastructure and on-site resources for each individual subsidiary. Using NGRERP's cloud-based deployment, enterprises can centralize implementation and package best practices to accelerate delivery further.

Dramatically Reduces IT Costs and Ongoing Maintenance

According to analysts, enterprises can spend as much as 90% of their IT budget on maintenance, not innovation. NGRERP's cloud delivery enables global businesses to automate their business processes within corporate lines of business and across their subsidiaries, without the multimillion dollar infrastructure and headcount resource costs required to run on-premise applications.

By eliminating the need for expensive infrastructure and maintenance (including hardware, middleware, databases and disaster recovery), NGRERP is typically able to slash overall IT costs by 50% or more. With NGRERP, enterprises can free up resources to focus on innovation, and gain the efficiency to extend standardized cloud ERP across subsidiaries.

Cloud ERP That Reaches Across the Enterprise

Maximizing the ROI on ERP means extending beyond automating back-office operations to streamlining sales and service processes. NGRERP encompasses automation of all elements of the business from core ERP to customer relationship management (CRM), professional services automation (PSA) and ecommerce. The result is streamlined order management and procurement processes, cross-functional reporting and elimination of business silos. NGRERP is

completely modular, so you gain the peace of mind that while the deployment may start with ERP, NGRERP can easily extend to support the broader business when the business needs it.

Flexible and Agile ERP That Keeps Pace with Your Business

Today's enterprises need customization for their individual operating units without the baggage of version-lock. NGRERP's Cloud platform supports complete application customization, including workflow management, scripting, analytics, web services, lifecycle management and more.

NGRERP allows each subsidiary to meet specific geographic, organizational and industry needs—such as a local business-specific workflows or specific business models and reporting requirements, while ensuring each business gets automated upgrades no matter the extent of customization.

Designed to Meet Industry Needs

Your operating units have different go-to-market needs and demand more than rigid, one-size-fits-all ERP. NGRERP provides key functionality to meet and adapt to unique industry requirements. Whether for global software companies with advanced revenue recognition needs, manufacturers or wholesale distributors with multi-site inventory and production, professional services organizations with disparate professional services resources and complex multi-currency client billing, or a retail/e-tail business with multiple channels, NetSuite is the only cloud ERP system with the depth, breadth and flexibility to meet vertical needs.

KEY NGRERP FEATURES FOR THE ENTERPRISE

NGRERP provides cloud financial, CRM, ecommerce and professional services automation management for enterprises across the global business. Additionally, each component of NGRERP is modular, enabling it to be deployed and integrated with existing investments as

required. NGRERP scales with global businesses by providing complete multi-subsidiary management and support for local accounting regulations.

Global Cloud ERP

NGRERP provides a complete cloud ERP system for global businesses. Businesses running on NGRERP can populate a single chart-of-accounts across subsidiaries, or use separate charts-of-accounts for each company within a single instance.

- NGRERP provides complete financial management, including invoicing and purchasing; time and expense management; project accounting and sophisticated revenue recognition management.

- NGRERP optimizes order management and fulfillment processes with order management that tightly drives the order process from quote to eventual fulfillment. Sophisticated multi-location manufacturing, inventory management and fulfillment ensure continually efficient operations.

- NGRERP streamlines procurement with a complete procure-to-pay process comprising workflow management, approvals, vendor self-service and payment.

Instant Consolidation and Visibility

Today's enterprises demand a clear view into business performance. NGRERP gives corporate, division and subsidiary stakeholders a true real-time view into every level of the business, through always-on financial and operational role-based dashboards and reporting with drill-down from summary to detail. NGRERP's cloud delivers secure visibility anytime, across any device and browser, anywhere on the globe.

NGRERP accelerates financial processes with real-time multi-currency consolidation and real-time roll-up across orders, accounts receivable, accounts payable, payroll, inventory, billing, invoicing and order fulfillment, from local in-country operations to the regional office to global headquarters. NGRERP provides sophisticated financial and statutory reporting for external stakeholders.

Multi-Currency, Multi-Tax, Multinational Intelligence

Enterprises can deploy NGRERP to every corner of the globe with confidence. With support for more than 190 currencies, NGRERP enables organizations to seamlessly meet the individual needs of local operations. With NGRERP, businesses can:

- Adjust for currency, taxation and legal compliance differences at the local level, with regional and global business consolidation and roll-up

- Maintain all currency exchange rates, and perform sophisticated roll-up across subsidiaries

- Get real-time visibility, ensuring consistent and compliant internal and external reporting both globally and locally.

About NGR
